

Wills Eye Institute Continuing Medical Education
presents
Complicated Cataract Cases: A Multi-Disciplinary Approach
on Saturday, January 23, 2010 to be held at:
Wills Eye Institute, 840 Walnut Street, Philadelphia, PA (Auditorium (8th Floor))
Registration and continental breakfast: 7:30 am Program: 8:00 am-12:15 pm

Robert D. Lehman, Jr., MD, Program Chair

Purpose and Objectives: The purpose of this course is to update the comprehensive and sub-specialist ophthalmologist to discuss complex cataract cases in an open forum case presentations to include pre-operative, intra-operative, and post-operative management. The format will be panel discussions with two cataract specialist and a sub-specialist from the field involved in the case.

At the conclusion of this update, the course participants should be able

- Recognize the management of challenging clinical situations such as cataracts in patients with pigmentary glaucoma, endophthalmitis, diabetic retinopathy, and low tension glaucoma
- Help to define the optimal management of new technologies associated with cataract surgery such as multifocal implants, accommodating implants and toric implants
- Define the most appropriate candidates for the new technologies and how to utilize to enhance patient satisfaction
