ACADEMIC CALENDAR | 2018-2019

PROGRAMS FOR OPHTHALMOLOGISTS, RESIDENTS,  
FELLOWS, AND ALLIED HEALTH PROFESSIONALS

# Julia A. Haller, MD

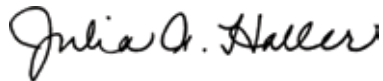

## OPHTHALMOLOGIST-IN-CHIEF WILLS EYE HOSPITAL

At Wills Eye Hospital, we thrive on a contagious quest for knowledge. Research, data, clinical insights, renowned expertise, and collaboration are the lifeblood of Wills' ability to drive the future of ophthalmic medicine. Academic excellence is a promise that we make to practicing ophthalmologists and those in training every day, whether it be within our hospital's walls, at one of the ambulatory surgery centers, as outreach from our Center for Academic Global Ophthalmology, or right on your computer thanks to the weekly streams of lectures and Chiefs Rounds. We believe this commitment to education is what has enabled us to turn out top ophthalmologists who advance the treatment of eye care worldwide—especially for patients suffering from the most complex eye conditions.

We share this academic calendar with you to make sure you are aware of all of the exciting things happening at Wills Eye and to keep you abreast of the information, tools, opportunities, and events available to you throughout the year. We hope to see many of you at the Wills Eye East Coast Symposium this fall in Washington, D.C. We also invite you to visit the Wills Eye booth at the American Academy of Ophthalmology Annual Meeting in late October, where a world-class lineup of our innovative faculty and alumni will present during 'Meet the Experts.'

Wishing all of you a year full of insight, promise, and purpose.

Warmest regards,

**JULIA A. HALLER, MD**  
**WILLIAM TASMAN, MD, ENDOWED CHAIR**  
**PROFESSOR AND CHAIR, DEPARTMENT**  
**OF OPHTHALMOLOGY, SIDNEY KIMMEL**  
**MEDICAL COLLEGE AT THOMAS**  
**JEFFERSON UNIVERSITY**

## Ralph C. Eagle, Jr., MD

**DIRECTOR, CONTINUING MEDICAL EDUCATION  
WILLS EYE HOSPITAL**

The education and training of skilled, informed ophthalmic practitioners have been a major mission of the Wills Eye Hospital since its founding more than 180 years ago. Wills ophthalmologists recognize that high-quality eye care rests on a foundation of scientifically valid and cutting-edge knowledge—knowledge that empowers them to treat complex eye diseases and restore and preserve sight. The nation's first ophthalmology resident trained at Wills, and the hospital remains a preeminent center for the training of future ophthalmologists. Wills is also strongly committed to providing practicing ophthalmologists with a wealth of outstanding continuing medical educational activities, each designed to enhance both their knowledge and the quality of their practices. We welcome you to participate in the activities listed in this calendar at Wills, via live streaming, or online.

A handwritten signature in black ink, which appears to read "Ralph C. Eagle, Jr." The signature is fluid and cursive.

LINKEDIN: Wills Eye Hospital

**At Wills Eye Hospital, improved access to education helps us to reach our goal of preserving sight and improving clinical care of patients with eye disease. Throughout the year, Wills Eye provides many opportunities to access online educational experiences.**

## **CHIEFS ROUNDS**

On Friday mornings at Wills Eye Hospital, tables are turned during Chiefs Rounds when residents present mystery cases to the Service Chiefs and Attending Physicians.

## **RETINAL IMAGING & SURGICAL RETINA CONFERENCES**

The Retina conferences are an interactive and engaging forum where our Retina fellows present images and videos of instructive cases and their management to the attendings of Wills Eye Hospital.

## **Fridays, 7 am ET**

### **CHIEFS ROUNDS**

# Creation of the Vickie and Jack Farber Vision Research Center

We are most fortunate that benefactors Vickie and Jack Farber have made a \$5 million gift, which adds to their initial \$2 million gift, to create the Vickie and Jack Farber Vision Research Center at Wills Eye. This generous grant will help us expand and create new foundations for vision-related research in strategic areas that capitalize on current clinical and research strengths.

Building upon the outstanding clinical and training environment at Wills Eye, the Vision Research Center will leverage advances in health delivery systems, data analytics, artificial intelligence, genetics, and precision medicine. The Center's mission is to use collaboration and innovation to drive breakthroughs that will empower lives through the prevention, treatment, and curing of eye disease. Our initial efforts will focus on learning more about patterns of eye disease and treatment effectiveness.

The establishment of the Vision Research Center will benefit our in-progress research initiatives. Our newly established Biostatistics

Consulting Core, led by Dr. Qiang (Ed) Zhang, has in a relatively short time provided consultation to over 30 research projects on a wide range of topics, substantially enhancing the quality of study design and biostatistical aspects.

Wills Eye was recently selected by the American Academy of Ophthalmology as one of five Data Analytic Teams to receive access to the full de-identified IRIS registry dataset. This launches our Ophthalmology Informatics Program, a collaborative project with colleagues at Thomas Jefferson University Hospital who have deep expertise in data analytics and mining of large datasets.

Continuing a partnership with Jefferson colleagues, we will be hosting a symposium on October 11 that focuses on neurodegeneration and neuroprotection, bringing together clinical and basic science faculty to foster collaboration and stimulate discussion on new avenues for research.

These are just a few highlights of our current activities and plans, with many more underway. We look forward to the transformational opportunities for growth that the Vickie and Jack Farber Vision Research Center jet fuels for Wills Eye.

## Wills Eye Ranked #1 Ophthalmology Residency Program

The Wills Eye Residency Program has been ranked #1 in the nation by Doximity's clinical reputation survey for 2018-2019.

In 1839, the first physician to be trained in ophthalmology as a specialty came to Wills Eye. Since then, we have trained the most ophthalmologists of any program in the country. Each year, hundreds of applicants compete for only eight openings.

"Our network of expertise circles the globe—from what we teach to how we train and who we train," said Julia A. Haller, MD, Wills Eye Hospital's Ophthalmologist-in-Chief. "We are very proud of the contributions our residents have made today and will continue to make to ophthalmology in the future."

# Congratulations to One of Vision's Greatest Visionaries

**Jerry A. Shields, MD**

INAUGURAL RECIPIENT

BRADY-SHIELDS ENDOWED  
CHAIR IN OCULAR ONCOLOGY

Celebrating a career of his singular accomplishments and world-renowned leadership, Wills Eye is pleased to announce that Dr. Jerry Shields, Director Emeritus of the Wills Eye Ocular Oncology Service, has been honored with the inaugural Brady-Shields Endowed Chair in Ocular Oncology.

Dr. Shields' pioneering contributions to the care and management of patients with ocular tumors are legendary. He has authored or co-authored more than 1,700 scientific publications and nearly 20 major textbooks, and the scores of awards he has received for his achievements include National Physician of the Year and the American Academy of Ophthalmology's prestigious Laureate Award.

Born in Pride Station, Kentucky, Dr. Shields completed a residency in ophthalmology at Wills Eye Hospital followed by post-residency fellowships in ophthalmic pathology and retinal surgery. The Brady-Shields Chair is named for three pioneering physicians

in ophthalmology and oncology: Luther W. Brady, Jr., MD, an esteemed Drexel University professor; Carol L. Shields, MD, Director of the Ocular Oncology Service at Wills Eye Hospital; and Jerry Shields, MD.

---

**AVE ATQUE VALE: LUTHER W. BRADY, MD**

Dr. Luther Brady was a consummate physician and Renaissance man with an extraordinary range of accomplishments both within his professional field of radiation oncology and in the larger community. In addition to tumors of the eye, he treated masses of the orbit, breast, lung, and cervix and cared for patients with malignant lymphoma and Hodgkin's disease. Clinician-scientist, art and music connoisseur, he wrote widely and lectured internationally. Dr. Brady died in Philadelphia on July 13, 2018. The Wills family and the world of oncology will miss him sorely, and we celebrate with gratitude his many contributions to medicine.
